

EL TORBELLINO

NEWSLETTER OF SAN DIEGO ORBITEERS FREE FLIGHT CLUB

JANUARY / FEBRUARY 2012

The Prez's Corner – Don Bartick

Happy New Years to everyone. It'll be a good year for new projects and many thermals. I'm sure all of you are praying for good to excellent weather for all our outdoor contests. We sure could use it.

The contest schedules for the monthlies and Dual-club Annual have been cast in stone. There was a small hitch with the Dual-club schedule. Lost Hills FF Airfield Assoc used the closest dates to last year's schedule and came up with the Mothers Day weekend. Many of you have received the schedule from Ted Firster. The dates have been corrected to the weekend of May 19th -20th. Please put these dates on your calendar and of course plan to be there. Since it is the SD Orbiteers Annual shared with the Fresno GMC Annual, it would be appropriate to support the event. Because we had a blowout last year and poor weather for the restart, both clubs suffered big losses. We have plenty of plaques from last year that can be salvaged for this year. This will dramatically reduce our operating funds. With luck, we'll be able to recoup the loss from last year. I know our club coffers could use the boost.

From having discussions with Larry Miller, it appears that our awards banquet is organized and ready to be held. Make sure you reserve the date: Jan 21. Details are provided in this ET. Be there.

This is a wrap for now. See you at the meeting. Bring something for Show & Tell and an A-6 to fly. The entry fee for our monthly indoor contest session after the meeting is now \$2. There's big money to be had, so build an A-6 and come get your share of the bounty.

San Diego Orbiteers and Scale Staffel Combined Banquet - Larry Miller

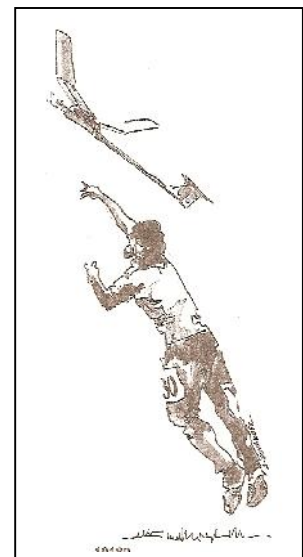

The annual year end banquet is Saturday Jan. 21st at 1:00 at Giovannti's on Clairemont Mesa Blvd. This yearly event gets better each year and always promises to be fun. Join us for the popular Italian buffet which includes salad, spaghetti, lasagna, pizza, garlic bread, and soda all for \$15 which includes tax and tip.

There are always new models on display and a slide show to be viewed. A raffle and show and tell are other favorites. Share with us your best or least favorite thing you experienced this past year while building or flying.

Awards will be presented for 2011 competition. Please come and enjoy a comfortable Saturday afternoon with your friends.

I look forward to seeing all of you!

Larry Miller

ON THE LIGHTER SIDE - H.Haupt

The results are in and tallied for the 2011 Indoor Fun Fly season. The results are as follows:

2011 Fun Fly Program

- 1) Don Bartick 10 points
- 2) Larry Miller 8
- 3) Howard Haupt 7
- 4) Mark Chomyn 5
- 5) John Hutchison 1

In 2012, the Indoor Fun Fly program will use the one-design formula that was adopted in the latter part of 2011. We will use the published A-6 designs of Fudo and Mather for our competition. Entry fees will be charged, with the resulting pot to be distributed to the winners per our outdoor monthly formula. The entry fee will be set at \$2. Consideration if being given to one or two surprise events during the course of the year. One thought is paper airplane contest using supplied 8 1/2" x 11" with use of no glue or fasteners.

Converting the Gizmo Geezer to handle BIG motors- New free flight worlds to conquer!

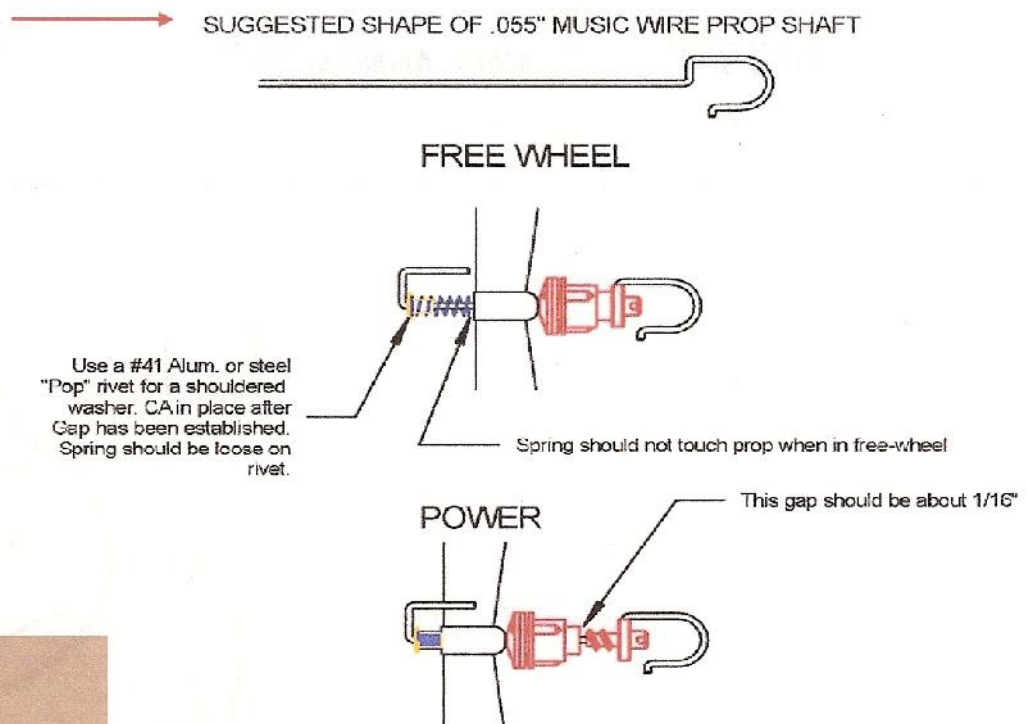

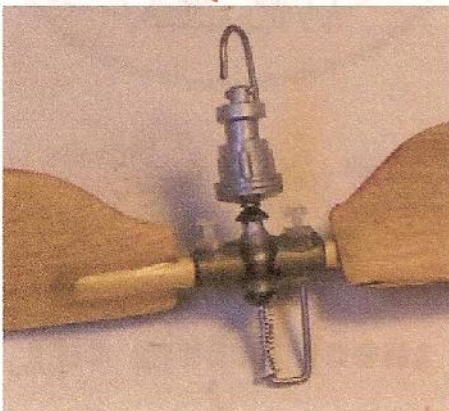

Orv Olm's Gizmo Geezer has legions of satisfied users. In stock form, it can handle up to 8 strands of 1/8 Super Sport with a breaking torque of 20 ounce-inches. One trick that many use to ease the rubber loading procedure is to hang a crocket hook on the rivet of the Gizmo's drive adapter. But don't be fooled into thinking that you can simply load up that crocket with bunches of rubber and go flying. The limiting factor will be the shear strength of the small plastic drive dogs on the bottom end of the prop shaft drive. Here's how to make a really stout Gizmo for up to 16 strands of 1/8" rubber:

Step 1: Start by debonding the CA in the drive shaft joints at the spinner and at the bottom end of the prop shaft drive. Then follow the instructions in the top right hand picture.

Step 2: Here's how to make Orv Olm's husky rebuild. Refer to pics at right which show the new drive shaft, 'pop-rivet' adapter and new tension spring made from a steel guitar 'E' string. It will now handle 12-16 strands of 1/8" Super Sport Rubber, and handle up to 56 oz-in. of breaking torque.

Modified GizmoGeezer, mounting a 12' prop with an adjustable pitch hub

NOTE: A heavier tension spring must be wound to support the larger motor. Experiment with a .011" or .012" guitar E string wire. Springs may be exchanged by threading them onto the prop shaft after assembly. Spring should be about 1/8" I.D. by 3/8" long with 8 to 9 turns.

MEETING MINUTES Dec/2011 - H.Haupt

With (4) members present, President Don Bartick advised that we did not have a quorum, this was followed by a hanger talk session and indoor fun flying.

Hanger talk and indoor flying concluded at 9:00 pm.

BWTM (But Wait, There's More) - H.Haupt

Don't you just hate it when things don't come out even? Well that is what has happened here. Two publications I receive use their last printed page for goofs, glitches, & gotchas. Here are a few:

Black Hole Award ...
 ... goes to Arrid Extra Dry antiperspirant. An Alabama reader ran out of it before he thought he would. Then he figured out why.
