Information page

Scale Follies

This is in place of the mandated FAC mass launches. Total of three flights. Please make your three flights early in case we need a fly-off!

Rubber

Covers all those wonderful Rubber Models that are not allowed to fly against the FAC scale or non-scale models. Time to let them show their stuff and how good they fly. (this event does not include P-30)

Don's Favorite

. We've never had an event that Don flew. Although he tried, he was not a gum band twister. He was known as "diesel Don". So, I've proposed an event that Don would love to fly and did!

It is for sport models that must look at least somewhat like a full-scale airplane and have a cabin with windshield or an open cockpit. Any number of wings are OK, in fact, the more the merrier! Also, must have a two wheeled landing gear mounted in the normal position. Power can be anything, glow, diesel, Jetex, CO2, or ignition. NO rubber or electric.

So, build a Dakota, a Sioux, or a Tom Boy, or whatever you want. Check out Outer Zone for Vic Smeed designs (he designed the Tom Boy), Vic did loads of sport models.

Flight scoring: You are allowed three flights, Each flight score is the sum of Duration divided by Eng. Run time. Your contest official score is the best of three

Contest Hours are from 0900 hours until the last man leaves!
