NFFS Models of the Year

"Every sport has its heroes, it's championship teams, it's best machines; Free Flight is no exception. The FAI events produce individual and team World Champions. The Nationals give us a winner in every class and age group. The current records tell another story. There is no question which modeler is on top this year, his name is a matter of record.

"In an insistent way the model gains as much prominence, and sometimes more, than the modeler himself. Which is more prominent, the Korda Wakefield or Dick Korda himself? What names can you link up with models like *Clodhopper, Gastove, Taltos, Nig Nog, Continental*? The *Zipper*: almost equal billing with Carl whatshisname.

"I thought it was high time that these tacitly acknowledged champion machines be given a proper celebration through the traditionally American procedure of proclaiming the models of the year."
